

ENHANCED MACHINE EFFICIENCY.

Excellent multi-function capability through dedicated hydraulic pumps and optimized circuit configurations. Innovative ease-ofuse features, such as the ability to reduce the frequency of foot pedal motions, improves operator efficiency.

MAXIMUM OPERATOR COMFORT.

New cab maximizes operator experience through increased space, improved visibility, optimized operator controls, reverse opening door for easier access to the harvester head, and options that include a heated and cooled seat, deluxe lights, and cameras.

POWERFUL PERFORMANCE.

Enchanced stability and travel speeds, along with a powerful combination of lift capacity, swing torque, and tractive effort provides for maximum performance, which allows machine to excel in harvesting and processing applications.

PROVEN RELIABLITY AND DURABLITY.

Forestry-duty cooling package and extensive validation of key common components that includes the engine, swing system, and grease-lubricated Cat[®] 336 HD HEX undercarriage ensure machine uptime and reduce operating costs.

UNOBSTRUCTED GROUND CLEARANCE.

Elevated, unobstructed carbody with 33" (832 mm) of ground clearance enables unimpeded travel over rocks, stumps, and other debris. Angle between carbody and roller frames allows maximum clearance across the width of the carbody.

EXCELLENT SERVICEABLITY.

Counterweight walkway enables machine level access to gull-wing engine enclosure that provides unmatched serviceability of components. Enclosure provides a flat area to complete preventative maintenance and service.
